92. Bill Pope has developed a new device that is so exciting he is considering quitting his job in order to produce and market it on a large-scale basis. Bill will rent a garage for $300 per month for production purposes. Utilities will cost $40 per month. Bill has already taken an industrial design course at the local community college to help prepare for this venture. The course cost $300. Bill will rent production equipment at a monthly cost of $800. He estimates the material cost will be $5 per unit, and the labour cost will be $3 per unit. He will hire workers and spend his time promoting the product. To do this, he will quit his job, which pays $3,000 per month. Advertising and promotion will cost $900 per month.

Required:

Complete the chart below by placing an "X" under each heading that helps to identify the cost involved. You can place an "X" under more than one heading for a single cost: for example, a cost may be a sunk cost, an overhead cost, and a product cost; you would place an "X" under each of these headings opposite the cost.

102. Brooke Foster is employed by Wong Laboratories, Inc., and is directly involved in preparing and packaging the company's leading sleep aid, RestWell. Brooke's basic wage rate is $15 per hour, and she is paid time-and-a-half for any work in excess of 40 hours per week. Additionally, Wong Laboratories provides a fringe benefit package that costs the company $5 for each hour of employee time (regular or overtime). During a recent week, Brooke worked 49 hours but was idle for 3 hours due to materials shortages.

Required:

(a.) Assume that Wong Laboratories treats all fringe benefits as part of manufacturing overhead. Compute Brooke's total wages and fringe benefits for the week and indicate how much of her wages and fringe benefits for the week would be allocated to direct labour and how much would be allocated to manufacturing overhead.

(b.) Assume that Wong Laboratories treats the part of fringe benefits related to direct labour as a component of direct labour cost. Compute Brooke's total wages and fringe benefits for the week and indicate how much of her wages and fringe benefits would be allocated to direct labour and how much would be allocated to manufacturing overhead.
103. Fred Adams is employed by the Cedar Manufacturing Company on their assembly line. Fred is paid $15 per hour for regular time, and time-and-a-half for all work in excess of 40 hours per week. During the two weeks of the pay period just completed, Fred reported the following:

Cleaning supplies are in the factory.
Assume the company uses FIFO.

Required:

(a.) Calculate the cost of the 27,600 equivalent units that were produced during the year.
(b.) Calculate the cost of the ending finished goods inventory.
(c.) Calculate the cost of goods sold.
106. Mary Tappin, an assistant Vice President at Galaxy Toys, was disturbed to find on her desk a memo from her boss, Gary Resnick, to the controller of the company. The memo appears below:

Galaxy Toys Internal Memo

Sept 15

To: Harry Wilson, Controller
Fm: Gary Resnick, Executive Vice President

As you know, we won't start recording many sales until October when stores start accepting shipments from us for the Christmas season. Meanwhile, we are producing flat-out and are building up our finished goods inventories so that we will be ready to ship next month. Unfortunately, we are in a bind right now since it looks like the net income for the quarter ending on Sept 30 is going to be pretty awful. This may get us in trouble with the bank since they always review the quarterly financial reports and may call in our loan if they don't like what they see. Is there any possibility that we could change the classification of some of our period costs to product costs—such as the rent on the finished goods warehouse?

Please let me know as soon as possible. The President is pushing for results.

Mary didn't know what to do about the memo. It wasn't intended for her, but its contents were alarming.

Required:

a. Why has Gary Resnick suggested reclassifying some period costs as product costs?
b. Why do you think Mary was alarmed about the memo?

107. For the majority of manufacturing companies, the distinction between period costs and product costs is essential because of its effect on net income for a period. Failure to make the distinction can affect the cost of goods manufactured and cost of goods sold.

Required:

Would the need to make the distinction between product costs and period costs still be essential if a manufacturing company were to adopt the just-in-time technique in the lean thinking model? Explain.
108.a) Compute the Cost of Goods Manufactured
   b) Compute Cost of Goods Sold
   c) What is the Gross Margin for the Year?
   d) Compute Net Operating Income.

**Learning Objective:** 02-03 Prepare an income statement; including the calculation of cost of goods sold.  
**Topic:** 02-10 The Income Statement.
During the month of May, Bennett Manufacturing Company purchases $43,000 of raw materials. The manufacturing overhead totals $27,000 and the total manufacturing costs are $106,000. Assuming a beginning inventory of raw materials of $8,000 and an ending inventory of raw materials of $6,000, what must be the total for direct labour?

A. $34,000.
B. $38,000.
C. $36,000.
D. $45,000.

DM used = 8,000 + 43,000 - 6,000 = $45,000.
DL = 106,000 - 45,000 - 27,000 = $34,000.

You are given the following data for January:

Which of the following is the cost of goods manufactured?

A. $89,000.
B. $78,000.
C. $79,000.
D. $80,000.

38,000 + 24,000 + 17,000 + 10,000 - 11,000 = $78,000.
34. During the month of June, Reardon Company incurs $17,000 of direct labour and $8,500 of manufacturing overhead, and purchases $15,000 of raw materials. Between the beginning and the end of the month, the raw-materials inventory increases by $2,000, the finished goods inventory increases by $1,500, and the work-in-process inventory decreases by $3,000. What is the cost of goods manufactured?
A. $38,500.
B. $40,500.
C. $41,500.
D. $43,500.

35. Mueller Company reports the following data for the year just ended:
- Raw materials used in production: $800,000
- Direct labour: $700,000
- Total overhead costs: $900,000
- Ending work-in-process inventory: $400,000
- Cost of goods manufactured: $2,500,000

What was the beginning work-in-process inventory?
A. $300,000.
B. $500,000.
C. $1,300,000.
D. $100,000.

C.G.M. + E.I. - Man. Costs
(2,500,000 + 400,000 - 800,000) - 700,000 - 900,000 = $500,000

36. Williams Company's direct labour cost is 25% of its conversion cost. If the manufacturing overhead cost for the last period is $45,000 and the direct materials cost is $25,000, what is the direct labour cost?

A. $15,000.
B. $60,000.
C. $33,333.
D. $20,000.

Let x = CC (conversion costs)
CC = DL + OH
x = .25x + 45,000
x = 60,000 Therefore DL 60,000 * .25 = $15,000

37. The Lyons Company's cost of goods manufactured was $120,000 when its sales were $360,000 and its gross margin was $220,000. If the ending inventory of finished goods was $30,000, what was the beginning inventory of finished goods?

A. $20,000.
B. $50,000.
C. $110,000.
D. $150,000.

CGS = Sales - gross margin = $360,000 - $220,000 = 140,000
B.I. = CGS + E.I. - CGM
B.I. = 140,000 + 30,000 - 120,000 = $50,000

38. The gross margin for Cushing Company for the first quarter of last year was $325,000 when sales were $700,000. The beginning inventory of finished goods was $60,000, and the ending inventory of finished goods was $85,000. What was the cost of goods manufactured for the first quarter?

A. $375,000.
B. $350,000.
C. $400,000.
D. $385,000.

CGM = CGS + EI - BI
= (700,000 - 325,000) + 85,000 - 60,000 = $400,000.
39. Last month, a manufacturing company had the following operating results:

<table>
<thead>
<tr>
<th>Category</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beginning finished goods inventory</td>
<td>$74,000</td>
</tr>
<tr>
<td>Ending finished goods inventory</td>
<td>$73,000</td>
</tr>
<tr>
<td>Sales</td>
<td>$464,000</td>
</tr>
<tr>
<td>Gross margin</td>
<td>$52,000</td>
</tr>
</tbody>
</table>

What was the cost of goods manufactured for the month?

A. $413,000  
B. $411,000  
C. $412,000  
D. $463,000

CGM = CGS + EI - BI  
= (464,000 - 52,000) + 73,000 - 74,000 = $411,000

40. The following information was provided by Wilson Company for the year just ended:

<table>
<thead>
<tr>
<th>Category</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beginning finished goods inventory</td>
<td>$150,750</td>
</tr>
<tr>
<td>Ending finished goods inventory</td>

</tr>
<tr>
<td>Sales</td>
<td>$475,000</td>
</tr>
<tr>
<td>Gross margin</td>
<td>$150,000</td>
</tr>
</tbody>
</table>

What was the cost of goods manufactured for the year?

A. $314,725.  
B. $335,275.  
C. $325,000.  
D. $464,725.

CGM = CGS + EI - BI  
(475,000 - 150,000) + 140,475 - 150,750 = $314,725
The following information was provided by Grand Company for the year just ended:

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Decrease in finished goods inventory</td>
<td>$4,655</td>
</tr>
<tr>
<td>Sales</td>
<td>$500,000</td>
</tr>
<tr>
<td>Gross margin</td>
<td>$100,000</td>
</tr>
</tbody>
</table>

What was the cost of goods manufactured for the year?

A. $95,345.
B. $104,655.
C. $395,345.
D. $404,655.

CGM = CGS - decrease in FG inventory
CGM = (500,000 - 100,000) - 4,655 = $395,345
